

# FOOTY FEUD!

## A MATHS GAME MASQUERADING AS A FOOTY GAME!

FREE  
PD

### A GREAT GAME TO ENGAGE YOUR STUDENTS IN MATHEMATICS

Footy Feud! is an Official AFL licensed game, created right here in Victoria! While the game is loved by kids for being fun and easy to learn, Andrew, the game's creator, calls it 'really a maths game masquerading as a footy game'!

Andrew is a former high school and university tutor with a keen passion for numbers and was inspired to create the game to help develop numeracy skills. Fast forward many years and the game has been featured as a learning tool for 1000s of kids in Australian classrooms and has received great feedback from teachers and students alike.

In this webinar, Andrew will run through how the game works, the game's key numeracy, strategy and problem-solving benefits for your students, and will also outline how the game can be applied in your classroom as either a fun afternoon or term-long activity.

Tuesday 25 July 2023  
3.45pm to 4.45pm  
Free webinar

- For school leaders, numeracy learning specialists, primary teachers and secondary teachers
- The session is free, share the news with your colleagues and encourage them to register
- Registration essential, [www.mav.vic.edu.au/events](http://www.mav.vic.edu.au/events)
- For more information contact Di Liddell, [dliddell@mav.vic.edu.au](mailto:dliddell@mav.vic.edu.au)
