THE MATHEMATICAL
ASSOCIATION OF VICTORIA

MAV24
CONFERENCE

Untangling 'maths' and 'calculating'

Dr Em Thompson

Mathematical knots

1. Take a piece of string
2. Tie a knot in it
3. Join the ends together

What does it mean for two knots to ‘be the same’?

- What do you *think* it should mean?
- What do you *want* it to mean?
- What *makes most sense* for it to mean?

How are we going to keep track of different knots?

- Should we give them names?
- How might we organise them?
- Do we need to set any conventions?

SPOILERSPOILERSPOILERSPOILERSPOILERS

Reidemeister moves

Crossing number

→ 352 152 252 prime knots with up to 19 crossings [B]

Links and Braids

When does a braid need more than one piece of string?

1. Draw a braid with as many vertical strands as you like (make sure there are the same number at the top and bottom)
2. Put in as many over-strands as you like (make sure they go the whole way across)
3. Starting at the top of one strand, follow it through until you get back to where you started
4. Make some observations, then try a different one!

maths \neq numbers + symbols

There is space for creativity in maths.

It can be tactile, artistic, ...

Event App

App Download Instructions

Step 1: Download the App 'Arinex One' from the App Store or Google Play

App Store

Google Play

Step 2: Enter Event Code: **mav**

Step 3: Enter the email you registered with

Step 4: Enter the Passcode you receive via email and click 'Verify'. Please be sure to check your Junk Mail for the email, or see the Registration Desk if you require further assistance.

Be in it to WIN!
