Fun Maths *Puzzles*

Level 1

If I take 5 away from a secret number and then double the answer I get 8. What is the secret number?
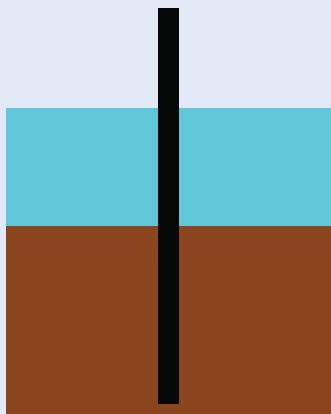

Level 2

Jesse counted a total of 15 bicycles and tricycles at the park. If the total number of wheels was 36, how many tricycles were there?

Level 3

One half of a pole is in the ground, another 1/3 is below water and four metres is above the water-line. How long is the pole?

Level 4

Use eight 8s and as many mathematical symbols as you like to make a number sentence with an answer of 1000.
