

# Maths Talent Quest 2021

## Student Information

The Maths Talent Quest is an open-ended mathematical investigation with your choice of topic.

- You should aim to choose an original and novel concept. Real world problems are often most interesting.
- Think about how you are going to gain information, collect data and analyse your results.
- You can enter as an individual, a group (maximum of six students) or a class.
- Your project must have a title and all references and assistance (including teachers and parents) must be acknowledged.
- You should aim to interest your audience. Remember primary and/or secondary teachers will be judging your investigation using the rubric.

### What Type Of Project Can I Choose?

<u>PROJECTS CAN BE</u>	<u>ALL PROJECTS MUST INCLUDE</u>
An <b>Investigation</b> (All entries should be investigations)	An abstract (a brief description of what you did and what you achieved); mathematical aims; observations and results; discussion on relevance of results; conclusion; references, bibliography and acknowledgements.
<b>Creative writing</b> (essay, story, collections of poems or letters, script for a play)	Mathematical aims; a list of key mathematical ideas; an evaluation (how well did you achieve your aim?); references, bibliography and acknowledgements.

<p>A <b>poster</b> or <b>booklet</b> presenting information in a sequence with a clear indication of the mathematics involved</p>	<p>Notes outlining mathematical aims, rules, the process of the investigation and conclusions; references, bibliography and acknowledgements. <b>All items must be uploaded online. Consider this when choosing your format.</b></p>
<p><b>Media or technology</b> such as: <b>computer program, website, video, audio</b> or <b>multimedia presentation</b></p>	<p>Notes outlining mathematical aims, rules, the process of the investigation and conclusions; script and indexed commentary; operating instructions; references, bibliography and acknowledgements. <b>Maximum running time is 10 minutes.</b></p>

**Note: All entries must be submitted and uploaded online. Please keep this in mind when choosing your presentation format.**

## How Do I Get Started?

Brainstorm a list of topics that you would like to investigate. It is important that you choose a topic that interests you. You may like to investigate a problem that has affected you, your family, your school or globally. Check out 100 Inspiring MTQ Titles [here](#).

## Get Planning:

What type of information or data will you require to complete your investigation? Make a list of all the types of data and information you will need. Create a timeline to ensure you will complete your investigation in time. Now is a great time to get a *critical friend*. A critical friend is someone who will give you feedback on your project, share ideas with you and ensure you stick to your goals. Your critical friend may be a teacher, parent or a fellow peer.

## Start Investigating:

Set yourself some goals and smaller questions. Once you have collected enough data and information you can begin your investigation. You may find that your investigative journey changes along the way - this is fine. Make sure you reset your goals & timeline as needed. Your focus may also change, which can sometimes make a more interesting

## Keeping Records:

It is very important that you keep records of your investigation and data. This is a great way to show that the work has been completed by yourself and provides the MTQ judges with an insight into your investigation. You can present all of your working and planning in a journal, attached in a folder or your work can be put into in your investigation. Some students find it helpful to keep a journal, however this is not compulsory. You can scan or take photos of your journal to show your work.

## Presenting Your Investigation:

It is very important that you keep in mind the rubric judging criteria whilst presenting your information. Make sure your aim, plan and conclusion is clear. Present your mathematical strategies, real world connections and terminology effectively. Ensure you have acknowledged any assistance and resources you have used. Be sure to present your work in a neat and legible manner, demonstrating you value your work.

## How Are We Going To Judge Your Project?

Please make sure you consult the 2021 State Judging Rubric for information about the criteria.

You can find more information about the Maths Talent Quest at <https://www.mav.vic.edu.au/Student-activities/Maths-Talent-Quest>

Most importantly challenge yourself and have fun!
