Plan of the Investigation

How are we going to do
this investigation?

Mathematical

Aim:

What are we trying
to do and why? What do
we predict?

We are going to find out
how much money we would
spend on food for one day

Results:

What do our results
tell us?

Topic No d h

My food will C
\$2.30 \$2.00

Round
up 3.30

Topic: Sharika
pure B

How much do we spend on food
in one day?

Last Sunday, we bought many
items. For food, we bought vegetables,
fruits, bread, milk and we ate
in a restaurant.

We spent \$43.50 for vegetables.
The fruits cost us \$23.50. We
bought bread for \$8 and milk for
\$6. Our final expense is the
restaurant, which cost \$55.

Vegetables - \$43.50

Fruits - \$23.50

Bread - \$8

Milk - \$6

Restaurant - \$55

Total cost \$136

In total We spent \$136 for

Conclusion:

Were our predictions
accurate?

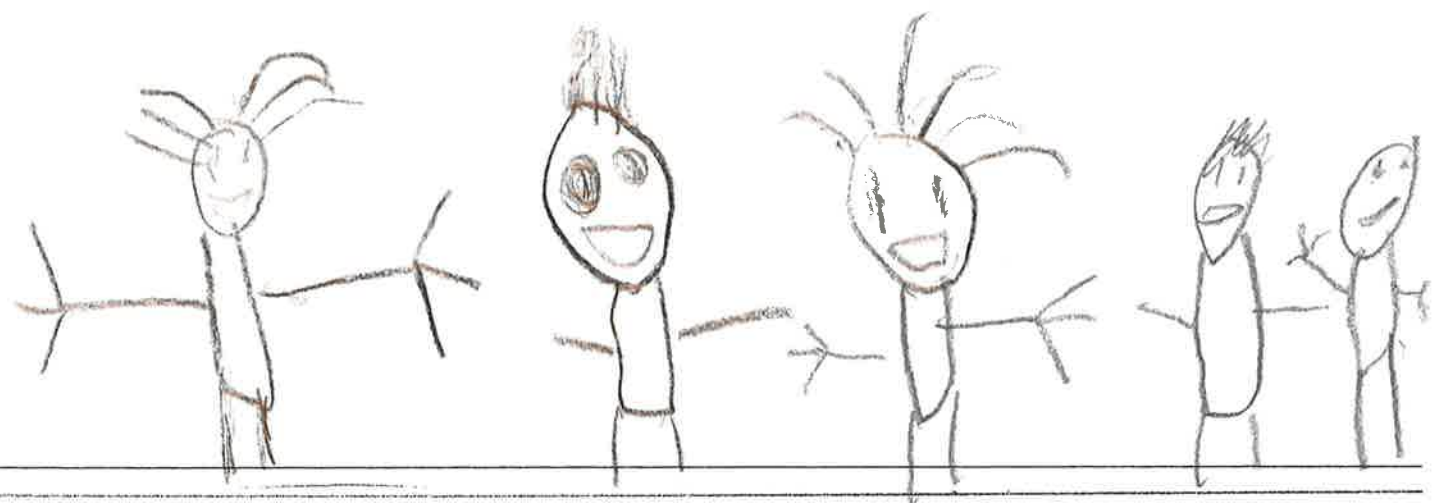

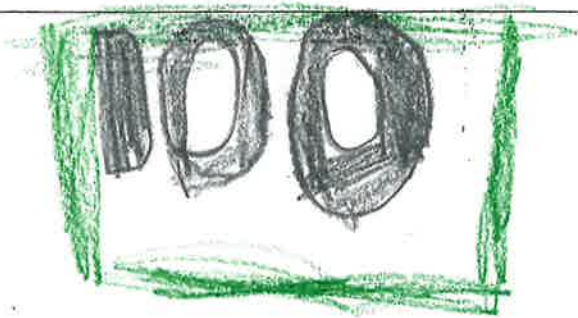

Topic Sharika

Noah and Tomisin spent the least.

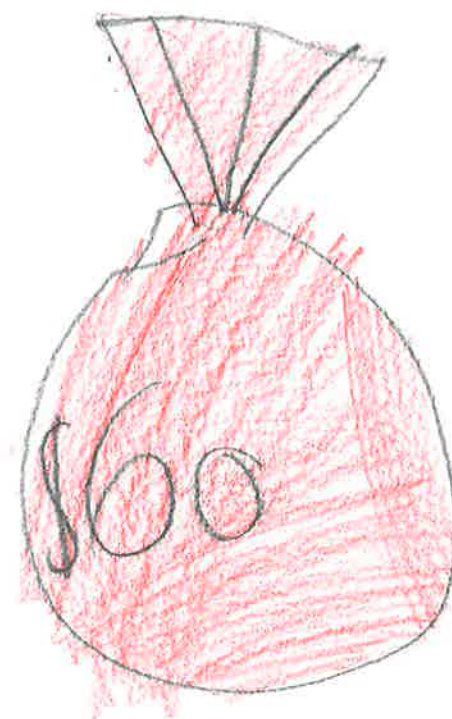

Lucas spent the most.

Topic Lucas

we spent more then we
thought.

Topic Tom, Siu

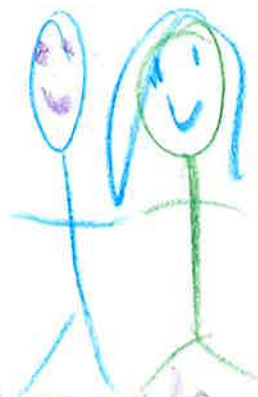

we spent more that u
thought.

Reflection:

What have we learned
about Maths?

Topic Tomisin

Matthew

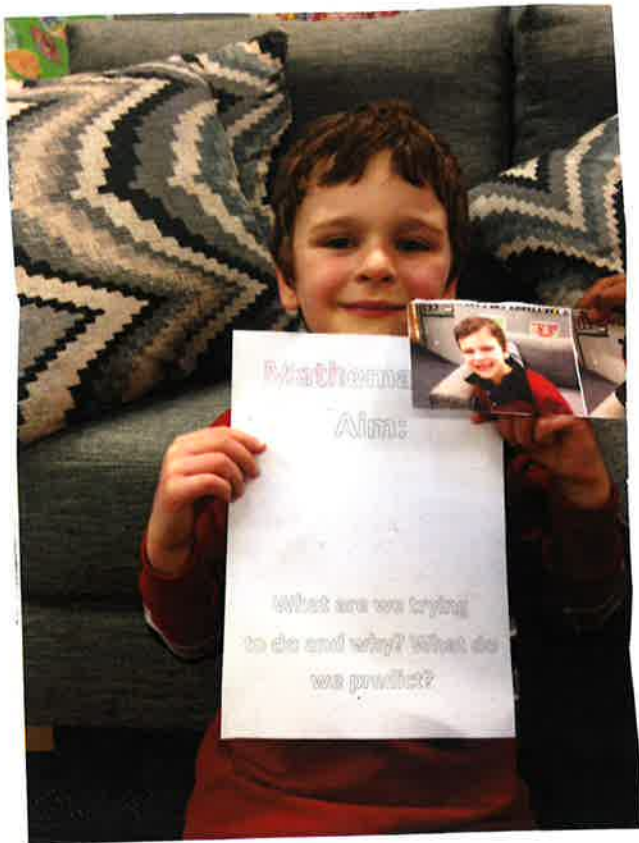

We Learnt how to make
a graph.

Topic Sharika

We learnt how to round
