

STATEWIDE MATHEMATICS GAMES DAYS 2023

- A new setting for mathematics
- Novel and challenging tasks
- FUN!

A Maths Games Day is an opportunity for students to develop their mathematical talents and thinking skills in a setting where maths is regarded as fun and worthwhile with like-minded students from a diverse range of schools.

It is an ideal way for students to participate in mathematical activities without the usual class room pressures and is a very effective vehicle for getting young people – particularly in the middle years of schooling – excited about maths. Problem solving and mathematical games address the Victorian Curriculum proficiency strands.

Questions? Contact Jen Bowden (Primary) or Helen Haralambous (Secondary).
