

# EARLY CHILDHOOD MATHEMATICS CONSULTING

## BESPOKE COACHING

MAV provides tailored support and networking opportunities for early childhood educators and educational leaders. Through bespoke coaching, we help build educator capacity in early mathematics education, equipping teachers with the knowledge and confidence to recognise and embed mathematical learning in everyday play.

Grounded in current research, this program empowers educators to:

- Strengthen their mathematical content knowledge.
- Understand how to integrate play-based mathematics into emergent curricula.
- Foster children's mathematical development in holistic, meaningful ways.
- Engage families in supporting maths learning at home and in play-based experiences.

## TRANSFORM YOUR TEACHING

With MAV's coaching, you'll gain the skills to see the maths in play and seamlessly weave these concepts into rich, play-based learning programs.

Available as a coaching option through School Readiness Funding – giving you the opportunity to strengthen practice while supporting children's mathematical development.
